Yorkshire Dales & North Pennines

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

Evening with MWIS - Kendal - Thursday 19th November 2026
Classroom weather workshop supporting Kendal Mountain Search and Rescue Team

General Summary for Wednesday, 11 November, 2026

British Mountain Summary:
Based on forecast chart for noon 11 November, 2026

Many places stay dry all day with sunshine and broken cloud. Below freezing on Scottish tops. A band of rain and hill snow moves into northern Scotland during the day, plus a strengthening northwesterly wind. Easterly winds for Wales, light rain in the south fizzles out, but leaves low cloud and dampness.

Headline for Yorkshire Dales & North Pennines

Sun and patchy cloud; wind drops light.

Detailed Forecast for Wednesday, 11 November, 2026

How windy? (On the summits) **Effect of wind on you?**	Easterly 15 to 20mph early in day. Dropping light and variable into middle of day and afternoon. From dusk, becoming northerly rising during night toward 30mph. **Mostly small.**
How wet? (Precipitation and its impact)	**Largely dry** Chance of an odd light shower mainly northeastern Pennines in morning, sleet or a snow flurry on higher tops.
Cloud on the hills? **Chance of cloud free summits?**	**Mostly north and eastern tops** Patchy cloud rolling over higher slopes mostly toward the east and northeast Pennines, but breaking westwards with tops more often clear around Three Peaks. **40% high N Pennines, to 70% W Dales.**
Sunshine? Air clarity (below cloud)	Sun best in west and southern areas, more cloud likely to come and go in northeast. Visibility excellent out of cloud.
How Cold? (at 700m) **And in the valleys**	1 to 3C, coldest North Pennines. Frost in sheltered valleys in the morning, mainly in western dales. Rising to 7 or 8C during middle of day.

Yorkshire Dales & North Pennines - Looking Ahead

	Thursday 12 November	Friday 13 November
How windy? (On the summits)	Northerly 25 to 35mph, strongest over higher North Pennines, up to 40mph for a time.	Northwesterly, 15mph to often 20mph on higher Pennines, perhaps slightly stronger at first on northern high tops.
Effect of wind on you?	**Affecting comfortable walking on exposed terrain, strenuous higher up with some buffeting. Significant wind chill.**	**Fairly small effect on walking, but marked wind chill on exposed terrain.**
How wet? (Precipitation and its impact)	**No precipitation expected**	**Precipitation not expected**
Cloud on the hills?	**None expected**	**None expected**
Chance of cloud free summits?	**Above 90%**	**Above 90%**
Sunshine? Air clarity (below cloud)	Extensive sunshine. Visibility excellent.	Extensive sunshine. Visibility excellent.
How Cold? (at 700m)	Around 0C. Feeling like -10C directly in the wind, risk -15C higher Pennines at times.	-1C rising to +1C. Wind chill feeling like -5 to -7C.
And in the valleys	Frost widely in valleys in morning. Rising to max 7C afternoon.	Much terrain frozen from dawn with frost all day out of sunlight. Maximum 6C by afternoon.

Planning Outlook

All mountain areas of Britain from Thursday, 12 November, 2026

Chillier in the second half of this week with frost widely, but much clearer conditions for all with sunshine. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - some rain mainly in western Scotland, whilst England and Wales may remain largely dry for the weekend. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.

Forecast issued at 15:25 on Tuesday, 10 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
